

# Suffolk County Libraries

## Library Online Map

The Suffolk Cooperative Library System is comprised of 56 autonomous individual libraries. Funding for each library is based on a formula that takes into account the number of registered cardholders in the library's jurisdiction. Library jurisdiction boundaries are based upon school district boundaries. We prepared an online mapping system so that when a new user registers online for a card we can determine which jurisdiction they live in. On the front-end, the user types in their address to a search bar and we in turn tell them which library they "belong" too, and give them driving directions to that location. On the back-end we have associated school district boundaries and library jurisdictions, forms for users to enter information to obtain a library card, linked those forms to the SCLS ILS, an administrative tool to log transactions and edit school and library boundary geometries, and provided driving directions.
